

Harmful molds and gases reduces the life of mechanical equipment and can cause produce to ripen and spoil prematurely.

CleanCooler™ Walk-In is your solution.

CleanCooler™ Walk-in by Fit Fresh is a chlorine dioxide gas-generating product specifically designed for placement inside of an walk-in cooler, floral or other cooler, display case, etc. to preserve optimal cleanliness. It reduces odor, displaces ethylene gas, cleans the atmosphere, cleans and removes stains caused by algae, mold, and mildew.

& Mildew Stains

FAQs

What is Clean Cooler Walk-In?

An in-SITU Chlorine Dioxide generator product designed for optimal safety and cleanliness.

How does Clean Cooler Walk-In benefit me?

The CleanCooler™ Walk-In is intended to reduce the labor hours required to clean and service walk-in coolers. Maintaining a clean environment in a walk-in eliminates the need for regular deep cleanings and constant product repair due to part failure.

Does it kill germs?

It kills 99.9% of dangerous pathogens including eColi, Listeria, Staphylococcus & Salmonella.

How long does Clean Cooler Walk-In last?

Under normal operating conditions (i.e., during exposure to ambient moisture during temperatures of 38–40 degree Fahrenheit), a single CleanCooler™ Walk-In packet will provide protection for up to 30 days within a walk-in cooler. CleanCooler™ Walk-In packets can maintain coolers small to large.

How do I know Clean Cooler Walk-In is safe to use?

CleanCooler™ Walk-In is EPA Registered, NSF Certified, and OMRI certified as safe!

Product Data

INGREDIENTS Material Number: 800-9000

Active-Sodium Chlorite:	1.75 g
Inert & Acidulant:	20.13 g
Net Weight of Ingredients:	21.88 g
